HIGH RISK TRAINING ACADEMY

CAPABILITY STATEMENT

MAXIMISE SAFETY, REDUCE DOWNTIME.

PRACTICAL TRAINING, DELIVERED DIRECTLY TO YOUR WORKSITE.

High Risk Training Academy (HRTA) is a Western Australian, family-owned Registered Training Organisation (RTO #46215) delivering nationally accredited, practical, and workplace focused high risk training.

Our approach is built around relevance, convenience, and efficiency. By delivering programs directly on site, we ensure every training session aligns with your work environment, your equipment, and your operational needs. This model not only enhances learning outcomes but also reduces business downtime and the need for staff to travel to external training facilities.

Our mission is to equip individuals and businesses with the qualifications and competencies essential for safe, confident, and compliant high risk work. We aim to deliver training that reflects the realities of modern industrial operations by engaging directly with the tools and conditions employees encounter each day. Through this applied approach, we support stronger safety cultures, more capable teams, and long-term workforce development.

Our vision is to be recognised as Australia's most practical and workplace integrated high risk training provider. We strive to set the benchmark for job ready skills by ensuring every participant finishes our programs with real world capability, confidence, and a clear understanding of safe operating practices.

VERIFICATION OF COMPETENCY (VOC)

We provide Verification of Competency assessments to help workplaces maintain safe operating standards and ensure qualifications remain current. These assessments are carried out with the same practical focus as our training, allowing employers to validate capability using familiar equipment and site conditions.

THE HRTA DIFFERENCE: FLEXIBLE DELIVERY CAPABILITIES.

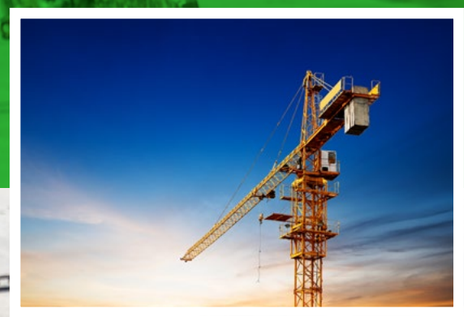
What sets HRTA apart is the way we integrate training into the operational rhythm of each workplace. We focus on equipment specific, scenario-based learning that mirrors real tasks rather than generic simulations.

Training is delivered by industry professionals who have extensive field experience and who understand the pressures, expectations, and compliance requirements of high risk industries. Rather than relying on simulated training environments, we deliver programs where work actually occurs. This ensures learning outcomes are relevant, immediately applicable, and aligned with the competency expectations of high risk industries.

Our delivery model is designed to give businesses complete control over how and when training takes place. We conduct all training at your site, allowing your team to learn within an environment that is familiar and operationally accurate. Because we work around existing schedules, we can deliver sessions during standard hours or outside core operating times to minimise disruption.

This flexibility allows us to support workplaces across Perth, regional Western Australia, and remote mining and industrial areas, ensuring access to quality training no matter where your operations are located.

Our trainers bring extensive industry backgrounds, which allows them to deliver instruction grounded in practical experience. Their knowledge of site requirements, equipment behaviour, and real world operational challenges ensures that training is more than theoretical, it becomes a direct extension of your workplace's safety and competency standards. Each program is delivered with an emphasis on practical application, helping participants gain confidence through hands on engagement with their own machinery, tools and environments.



WHERE WE WORK AND THE INDUSTRIES WE SUPPORT

From our base in Perth, HRTA supports industries across the state, including mining, civil construction, transport, logistics, manufacturing, and general industrial operations. Our ability to mobilise to regional and remote locations allows us to work closely with diverse businesses that require consistent, compliant training regardless of their geographical constraints. Through this reach, we play a role in building capability across Western Australia's most essential sectors.

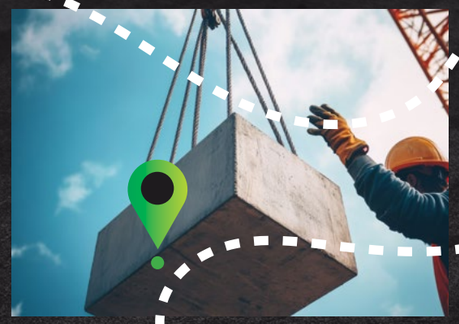
OPERATIONAL FRAMEWORK

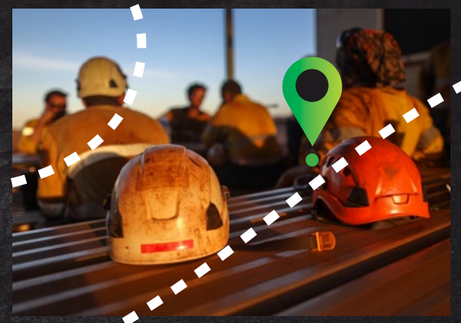
MAXIMISED SAFETY, REDUCED DOWNTIME.

OUR CORE TRAINING CATEGORIES

HRTA delivers nationally recognised training across the full spectrum of high risk and industrial skill areas. Our offerings span dogging and rigging, crane operation, high-risk work licences, civil plant operations, asbestos and demolition competencies, silica awareness, general safety training, and Verification of Competency assessments. Each program is shaped to suit the equipment and operational practices of the site, ensuring learning outcomes that translate directly into safe and capable workplace performance.

As a Registered Training Organisation, HRTA upholds the regulatory standards required for high quality Vocational Education and Training. Our trainers are qualified and experienced professionals committed to delivering rigorous, competency based assessments. Every course is delivered with a focus on safety, operational accuracy, and compliance with national training and licensing requirements.





THE BENEFITS OF ON-SITE TRAINING

FOR EMPLOYERS

- Reduced downtime and no travel requirements
- Training tailored to site-specific procedures and equipment
- Stronger safety culture and improved compliance
- Workforce capability aligned to real operational needs
- Practical, measurable competency outcomes

FOR PARTICIPANTS

- Nationally recognised qualifications
- Real-world confidence built through applied learning
- Skills relevant to major WA industry sectors
- Flexible training schedules that support work–life balance
- Job-ready capabilities that enhance employability

COLLABORATIVE PARTNERSHIPS

To extend our reach and ensure comprehensive course availability, HRTA partners with several established Registered Training Organisations including Harness Energy Services, All High Risk Training, and Halo Nation Training. These collaborations allow us to deliver a broader suite of programs while maintaining consistent quality and assessment integrity across all training engagements.

OUR COMMITMENT

We are committed to delivering training that builds safer workplaces, stronger teams, and long-term career opportunities. By combining expert instruction, practical delivery, and true site integration, HRTA remains the training partner of choice for high risk work across Western Australia. Our focus on flexible, relevant, and high impact training ensures that every organisation we work with benefits from improved safety, compliance, and productivity.
